

PSO Meeting Minutes March 4, 2021

Principal report- athletic competitions started this week. Girls volleyball team played in the gym, very exciting. School opening for EW Hubs- students come in 2 days a week based on academics and attendance if they are struggling they will be invited to come in. Another time students can come in for in person office hours, students will have to adhere to staying in a cohort. Staff is working hard on this. Opening 3/28 for the hubs. Registration is in process for next year. Parents need to work with counselors to make sure kids get the classes they need. Students will select their own classes in Skyward and there is a link on the school website with more information about registration. ASB did a care week last week over zoom with student activities. Students are earning awards through club participation and competitions online.

Teacher report- staff members Cindy Scott and Wendy Priest sent thank yous for the Jaiiya

Treasurer report- bank balance \$13, 700 Lots of teachers have not picked their coffee at Jaiiya yet, we still have money there to spend. Could do something the first week of May which is a certificated staff week if that works to reach more staff members. Most teachers will be back in the building at least some days a week starting 3/28.

Communications report- Escapade will work with Chris to send out information for the Grad Grams, gift for all of the seniors at graduation time. Chris is collecting photos and stories to share about grants we have given in the past to advertise what we do with our money to go along with our annual fundraiser. We will start the week after spring break with our annual fundraiser. March 25th is the deadline to get info to Nancy Ray to get this into the next Warrior Connect. Chris will get this info to her.

Grants- Cynthia Hansen (para educator in CTE programs) put in a grant for noise canceling headsets- \$850 for 25 headsets for students who live in homes that do not have a room or space to themselves and work in a loud environment. We are wondering how it would be determined which children would get these headsets. Allison will ask her this and determine if she has talked with Teresa about this and about how to identify students. They are \$34 with tax each and have a microphone. We could donate them to the school and the school can barcode them and distribute them. Allison will gather more info and we can vote on this at the next meeting or convene earlier briefly if needed.

More info on the EW Hubs- March 16 parent info night, beginning stages of planning, doing this instead of a hybrid model because allows school to continue with current model and does not require a whole new system which there is not time to do. There will be a targeted group who is struggling and will come in the morning and do their Zoom classes. Then there will be a workshop time in the afternoons 1 day a week for each student to come in for 70 minutes if they can get to school on their own. We can fit about 300 students a day with the social distance rules. Want students to have a connection to their teachers and school. Will wear masks and socially distance, HVAC system is working as needed to help prevent further spread as long as students stay 6 feet apart, surfaces will be sanitized also. They will be assigned to a cohort for contact tracing COVID if needed. Students cannot roam around the building and cannot hang out in the parking lot together after. This will be completely optional and not extra assignments. These will be enrichments and support for students. Will be a seat for every kid that wants one. Students will have to have immunizations up to date (not including COVID vaccine)

Next meeting is April 15th 7pm. Michelle will send the link.
